

# USAGE DEMO

## 1. Start keylogger

```
(myenv)-(kali@kali)-[~]  
$ python3 keylogger.py  
Enter a log filename (e.g. mylog.txt): keylog.txt
```

## 2. Use Terminal

```
kali@kali: ~/Desktop/OK-VPS
```

```
File Actions Edit View Help
```

```
(myenv)kali@kali: ~ ❏ kali@kali: ~/Desktop/OK-VPS ❌
```

```
(kali㉿kali)-[~/Desktop]
```

```
$ ls
```

```
arshil.ovpn      haiti          OK-VPS          GET KALI Pen_Test_Assessment.ova.7z  reports MUNIT
```

```
blackeye.zip     http.pcapng    OSINT-Framework pentestlab       request
```

```
canadagoose.com key_pass.txt   Osintgram       Profil3r         reverse-shell-
```

```
dmitry           malware.exe    osrframework    ReconDog        server.pem
```

```
HACK-CAMERA      maybe_b64.txt  Pen_Test_Assessment.ova RED_HAWK        shellmk.php
```

```
(kali㉿kali)-[~/Desktop]
```

```
$ cd OK-VPS
```

```
(kali㉿kali)-[~/Desktop/OK-VPS]
```

```
$ ls
```

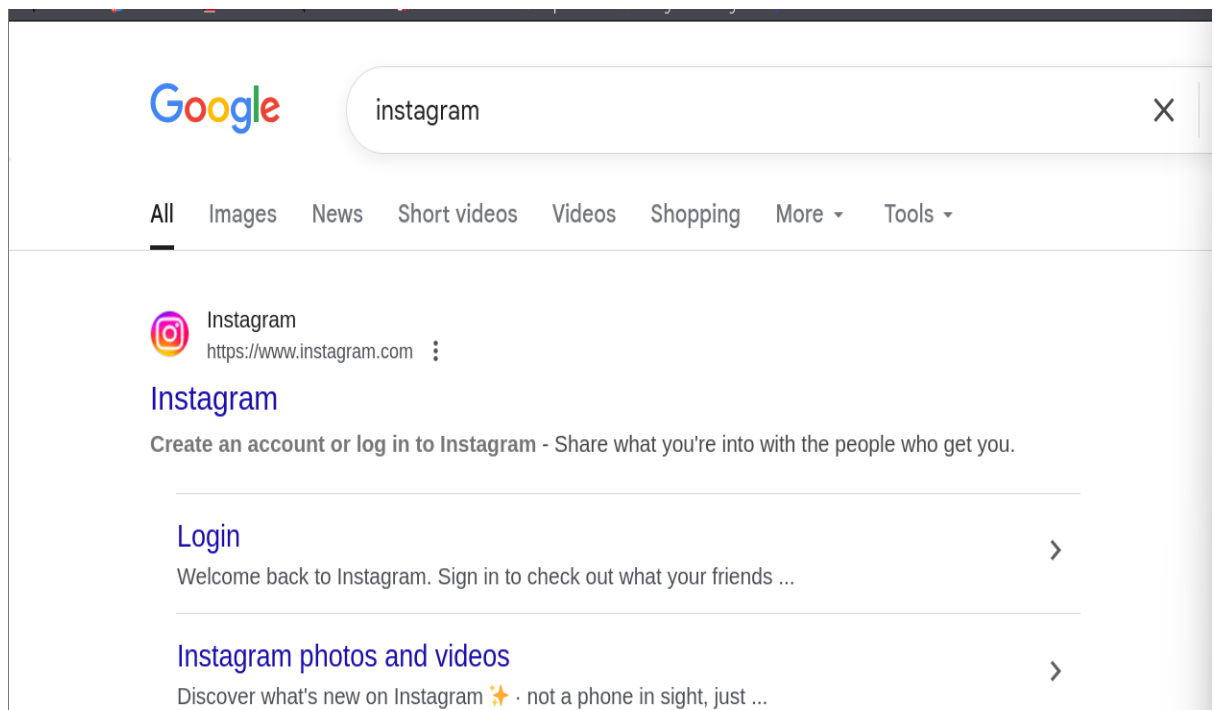

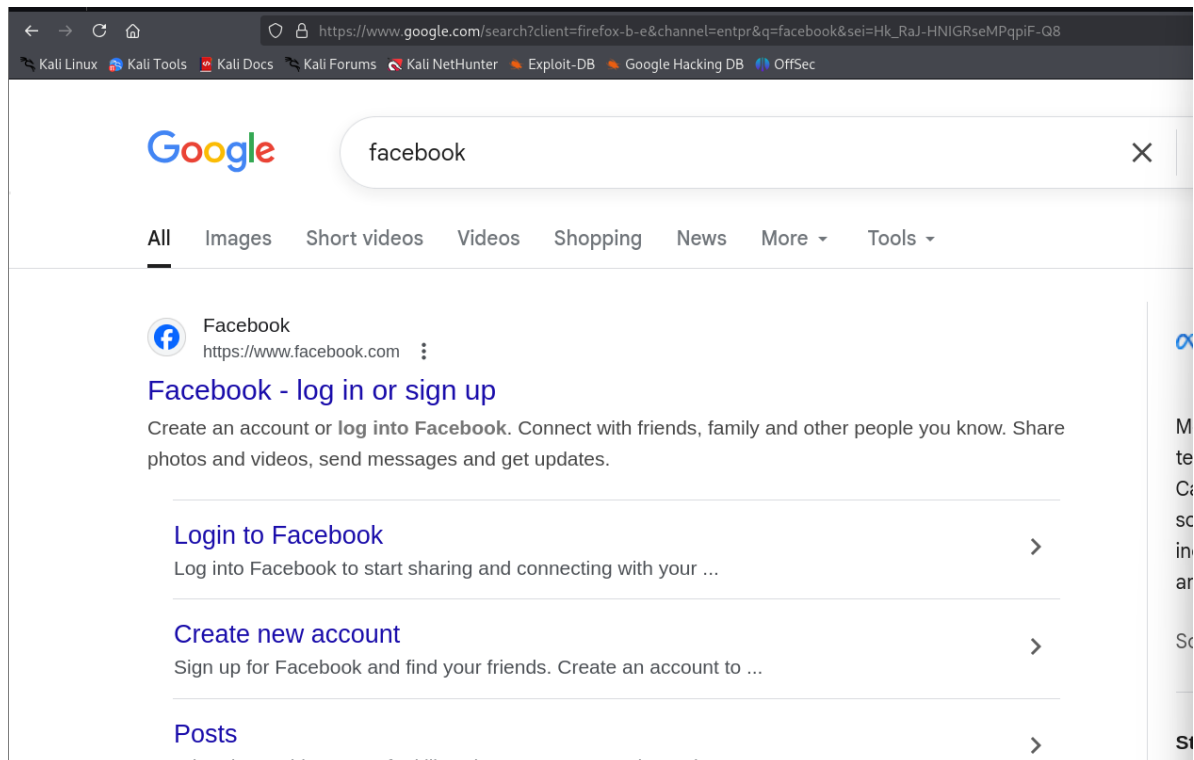

```
okvps.sh  README.md
```

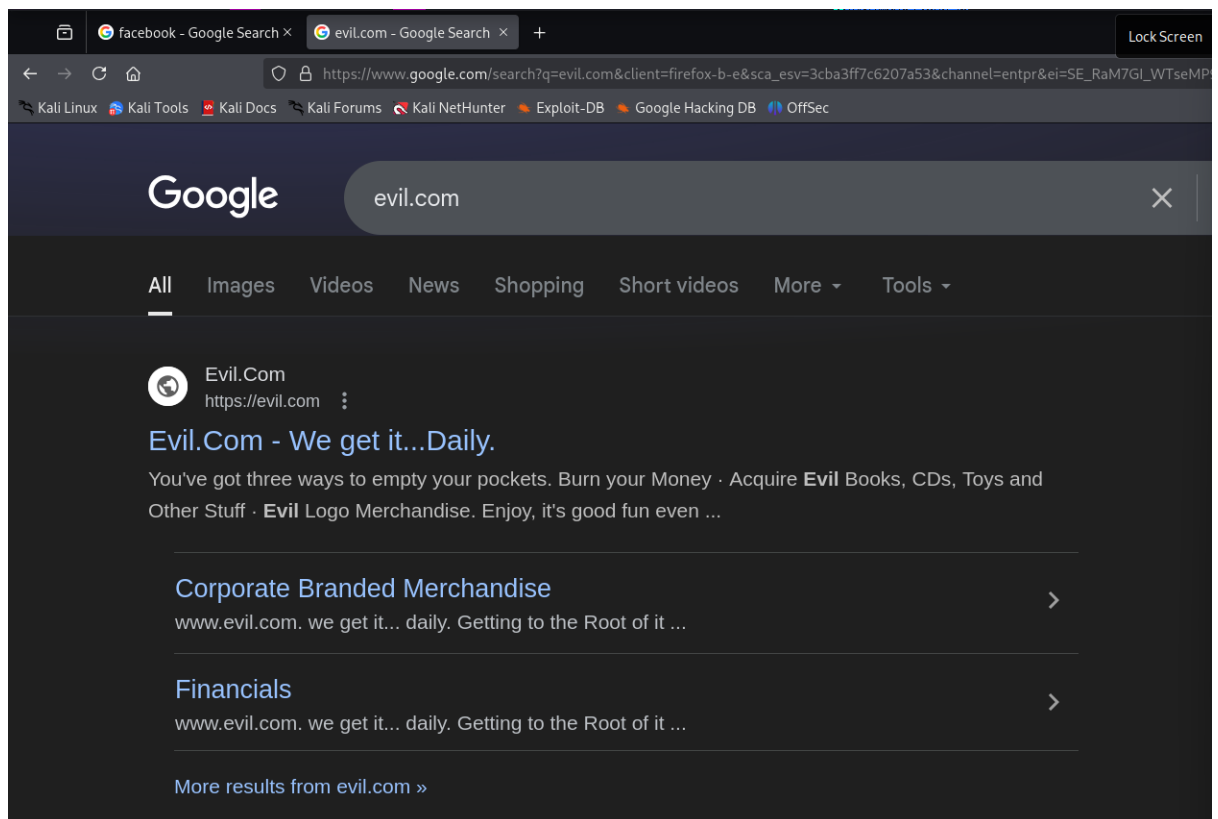

```
(kali㉿kali)-[~/Desktop/OK-VPS]
```

```
$ █
```

```
